## INFORMATION

**TIME ADVANTAGE----**The offensive wrestler who has control in an advantage position over his opponent is gaining time-advantage. A timekeeper assigned to each wrestler records his accumulated time-advantage throughout the match or a multiple timer may be permitted to record the time-advantage. At the end of the match the referee subtracts the lesser time-advantage from the greater. If the contestant with the greater time-advantage has less than one minute of net time-advantage, no point is awarded. If he has one full minute or more of net time-advantage, he is awarded one point.

**TAKEDOWN----**Whenever a contestant brings his opponent to the mat and gains control while the supporting points of either wrestler are within the wrestling area he has gained a takedown. Two points are awarded for each takedown.

**STALEMATE----**When the contestants are interlocked in a position other than a pinning situation in which neither wrestler can improve his position nor tries to improve his position, the referee shall stop the match and wrestling shall be resumed as for out-of-bounds.

**NEUTRAL POSITION----**Is a position in which neither wrestler has control.

**ESCAPE----**An escape occurs when the defensive wrestler gains a neutral position while the supporting points of either wrestler are within the wrestling area.

**REVERSAL----**A reversal occurs when the defensive wrestler comes from underneath and gains control of his opponent either on the mat or in a rear standing position while the supporting points of either wrestler are within the wrestling area.

**FALL----**The two second count shall be a silent count by the referee and shall start only after the referee is in such position that he knows positively that a fall is imminent, after which the shoulders or scapula area must be held in continuous contact with the mat for two seconds before a fall shall be awarded.

**NEAR-FALL----**A near-fall is a position in which the offensive wrestler has control of his opponent in a pinning situation with both shoulders or the scapula area held in contact with the mat for five full seconds. Three points shall be awarded for this situation.

**PREDICAMENT----**A predicament is a position in which the offensive wrestler has control of his opponent in a pinning situation and a fall or near-fall is imminent.
