Brief Description of Wrestling

- 1. Wrestling is an individual sport that helps develop individual initiative, mental alertness, physical toughness, courage and physical efficiency to carry on.
- 2. The object of wrestling is to hold your opponent's shoulders to the mat for two seconds. To do this, it will include taking your opponent from his feet to the mat, turning him on his back and holding him there while he is resisting with his fullest capacities.
- 3. The fine part of wrestling competition is that individuals are competing against opponents of the same weight. That gives everyone opportunity to learn and wrestle to the best of his ability.

Definition of Wrestling Terms

- Defensive wrestling - The wrestler who is on the bottom when both wrestlers are off their feet.
- Offensive Wrestling - The wrestler who is in the top position when both wrestlers are on the mat.
- Control - ----- Where one wrestler has the advantage in the down position.
- Take Down ----- Whenever a contestant brings his opponent to the mat and gains control while the supporting parts of either wrestler are in bounds.
- Escape ----- Occurs when a defensive wrestler comes from underneath to a neutral position.
- Reversal ----- Occurs when a defensive wrestler comes from underneath and gains control.
- Fall ----- Any part of both shoulders held in contact with the mat for a period of two full seconds.
- Near Fall ----- A situation where an offensive wrestler has control of his opponent in a pinning situation and both shoulders are held within two inches of the mat for a period fall of two seconds.
- Predicament ----- A position where an offensive man has his man in a pinning combination and a fall or near fall is imminent.
- Illegal Holds ----- A one point penalty.

SCORING FOR WRESTLING

- Take Down - 2 points
- Escape - 1 point
- Reversal - 2 points
- Near Fall - 3 points
- Predicament - 2 points
- Time Advantage - 1 point
