Wrestling

Jamestown Red Raiders
1968-1969 Wrestling

Wrestling, one of the oldest sports in the world, is comparatively new at J.H.S. Coach Thomas, nevertheless, steered his team to a fine record of nine wins, four losses and one tie. The coach was especially pleased with the number of boys out for each weight class – frequently three or four for each of the divisions – which showed an increase in interest for this sport. To further the popularity of the sport, the wrestlers also put on an assembly for the J.H.S. students, illustrating techniques and scoring for the sport. With a great number of underclassmen on this year's squad, Mr. Thomas looks forward to another winning season next year.

Assemblies

Assemblies at J.H.S. have provided a means of entertainment and education. Programs have ranged from a NASA representative who conducted experiments and made students aware of the many aspects of the modern space program to a demonstration of wrestling techniques by the Raider wrestling team. A former drug addict, accompanied by a member of the Bureau of Narcotics, presented a most informative program on the effects of drugs. Pep assemblies held throughout the year aroused the spirit and enthusiasm that led Raider teams to victory. The Music Department also held assemblies at Christmas and in the spring, giving students an opportunity to hear the band, orchestra, and choral groups.
